

Your Challenge Drives Our Solution

From custom injection molding and 3D printing to automation, integration, and contract manufacturing, we transform manufacturing challenges into scalable solutions. Backed by decades of experience, we help customers improve quality, reduce costs, and drive operational excellence.

Plastic Injection Molding

7th Street Solutions' state-of-the-art plastic injection molding facility delivers exceptional efficiency, scalability, and cost-effectiveness, making it an ideal manufacturing solution for high-volume production. By utilizing advanced molding technologies and rigorous quality controls, we consistently produce large quantities of precision-engineered, identical parts while minimizing waste, reducing production costs, and maintaining strict tolerances.

Automation & Integration

From automating complex manufacturing processes to optimizing production lines and designing custom equipment, 7th Street Solutions provides end-to-end automation and integration solutions that improve performance and efficiency. By combining innovation, precision engineering, and a commitment to quality, we help manufacturers streamline operations, reduce costs, and achieve sustainable growth.

3D Printing

7th Street Solutions' full-service, on-site 3D printing lab delivers fast, flexible, and cost-effective prototype manufacturing capabilities. By enabling precise customization and rapid design iteration, our additive manufacturing solutions help customers streamline product development, validate concepts efficiently, and accelerate time to market.

Value Added Assembly

Our value-added assembly solutions combine advanced automation, poka-yoke devices, and lean manufacturing principles to create efficient, repeatable assembly processes. From simple sub-assemblies to complex finished products, 7th Street Solutions helps customers improve quality, reduce costs, and accelerate time to market through precision-driven assembly operations.

What Sets Us Apart

ABOUT US

- 90+ Years of Manufacturing Distinction
- 40+ Years of automation and controls experience
- Sole manufacturer of the Rainbow Home Cleaning System
- ISO 9001:2015 QMS
- Delivering high-quality, cost-effective manufacturing solutions from concept to production through custom injection molding, additive manufacturing, automation, integration, and contract manufacturing services

Discover the 7th
Street Difference

YOUR INVESTMENT

Choose Precision. Choose 7th Street Solutions.

Our 360,000-square-foot state-of-the-art manufacturing and technology center operates under an ISO 9001:2015-certified Quality Management System, ensuring exceptional quality, consistency, reliability, and performance across all products, processes, and services.

When quality, precision, and reliability matter, the choice is clear. Let's build something exceptional together.
